Information about the Blik op Werk quality mark

De Taalvraag has had the Blik op Werk quality mark for 8 years. In the satisfaction survey, the students were always very satisfied: the average of those 8 years was a 9.2 out of 10. And in 2023 and 2024 this was a 9.6.

De Taalvraag will stop using the quality mark from 2025. Previously it was necessary so that students could get a loan from DUO. But with the new integration law, there are very few students with a DUO loan. And the costs are very high, and also the amount of administration. We prefer to keep the prices of the courses affordable and to invest the time in high-quality lessons in small groups.

Does it make a difference for students who integrate with De Taalvraag?

NO! If you don't need a loan from DUO, it makes no difference.

Some students ask: isn't it important that my hours count for my integration at a school with a quality mark? No, that doesn't matter either. Those hours are only important if it takes you longer than 3 years to integrate and you have completed 600 hours of lessons. At De Taalvraag you can go from A1 to B1 within 1 year and 160 hours. We only have fast courses. If you need 600 hours, you cannot take a course at De Taalvraag.

We are still a covenant partner of the municipality of Rotterdam. They also visit classes every year to check the quality.

We are now also a member of the Rotterdam International Center.

And the teachers at De Taalvraag are certified and affiliated with the professional association of NT2 teachers.
